GRAPE VINE CUTTINGS & GRAFTING MATERIAL - 2015

Dear Grape Grower and Winemaker,

Enclosed are the McLaren Vale Vine Improvement Society (MVVIS) availabilities and order forms for cutting season 2015.

McLaren Vale Vine Improvement has been at the heart of McLaren Vale's development for over 30 years. McLaren Vale Vine Improvement continues to offer a wide selection of *vinifera* cutting material through our committee of local volunteers. Despite tough times McLaren Vale Vine Improvement is still here to service the market with virus free, guaranteed true to variety and clone material. And we can sleep a little more securely if we know that the 5 acres of rootstocks set up by MVVIS at Dead Dog Swamp are there if phylloxera was to ever threaten us.

Our membership has been available to all for a token amount each year. If you are ordering material we need you to **renew your membership to benefit from discount on cuttings**, or if you are not a member join for the first time.

On behalf of Vine Improvement we ask you to make an investment in the security of the McLaren Vale industry for our futures. We hope you will help us.

Read the information, check your requirements against our availabilities and return your order to MVVIS as soon as possible. Orders received before 31 May, 2014 will be given priority and orders received with a deposit will be given highest priority.

If you have any queries please call me on 0400 656 350.

Regards,

James Hook

Chair, McLaren Vale Vine Improvement Society Inc

New Varieties.

A large number of wine grape varieties have been released from quarantine and propagated by Australian Grapevine Foundation Planting Service Inc (AGFPS). McLaren Vale Vine Improvement Society Inc is a member of AGFPS and is looking for grape growers interested in establishing source blocks for any of the new varieties.

Contact us for information on the new varieties.

FOR YOUR INFORMATION

Quality Assurance

McLaren Vale Vine Improvement Society's procedures are audited annually by third party auditors to ensure we are maintaining a quality system and delivering quality products and services.

Vinifera Source Areas

Material is cut from registered source areas in the McLaren Vale region. These areas are maintained in accordance with Industry Accreditation requirements. Should MVVIS have insufficient material to meet particular orders and suitable material is available from another Vine Improvement Region, you will be contacted before we fill the order. Material is also available from non-registered source areas.

Root Stocks

MVVIS has developed its Willunga root stock vineyard using trellised training systems. This source is maintained by MVVIS as insurance in case of McLaren Vale having a phylloxera outbreak.

Labelling

Vinifera cuttings are supplied in bundles of 100. Bundles are tagged as follows –

- Blue labels are attached to A Class certified material
- Yellow labels are attached to non-certified material.

All labels identify the variety, clone and source of the material.

All source blocks whether certified or not, have been inspected and health checked.

Treatments and Services

Packaging for Interstate Customers

All materials are packaged in plastic. This protects the cuttings from dehydration and the buds from physical damage during handling. Each package is identified with a note clearly identifying the customer and the contents of the package. Where several packages are required to complete an order, all relevant stock notes are recorded on a delivery note summary. Primary Industry SA certification is provided for interstate orders.

Additional charges apply.

Cold Storage

The customer will be notified when orders are ready for collection or despatch. A 2 day cold storage period from the time of notification is offered free of charge whilst the customer completes collection or despatch arrangements

Extended Cold Storage

\$10.00 plus GST per 100 cuttings

An extended cold storage charge will apply to material held in cold storage up to 31 October, 2015. At that date the cold store will be shut down. Customers wishing to extend cold storage beyond that date should contact the Society prior to discuss arrangements. Material for extended cold storage will require fungicidal treatment. 24 hours notice is required for pick up.

TERMS OF AGREEMENT

1. The customer agrees unconditionally to accept and pay for the above order at the price specified and to pay a deposit of 25% once the order has been placed.
 2. Where an order placed by the customer and fulfilled by MVVIS can only be cancelled without penalty if MVVIS is able to sell the ordered product to another customer prior to 31 October in the cutting year.
 3. The customer agrees to take delivery of the material within two days of notification that the order is ready for collection unless by prior arrangement.
 4. Freight is to the customer's account and the customer acknowledges the freight operator is not a common carrier and the customer will therefore bear the risk of loss or damage whilst the goods are in transit.
 5. It shall be the obligation of the customer to inspect the goods on delivery.
 6. Any claim in respect of unacceptable quality or short delivery must be notified in writing to MVVIS within 5 days of delivery.
 7. Risk in the goods shall pass when the goods leave the premises of MVVIS.
 8. MVVIS will replace vines that are not true to type if advised within twelve months of delivery. It may be necessary to wait until the following season for replacements.
 9. The customer acknowledges that whilst MVVIS has made every endeavour to provide clean material, MVVIS can give no guarantee in respect of the following vine propagation material – presence of viral/viroid infection, presence of phytoplasma infection, presence of bacterial infection, presence of other pests/diseases.
 10. The customer acknowledges that MVVIS is not responsible for and makes no warranty regarding the survival rate in relation to the material or regarding any other matters relating to the performance of the vines. Without limiting the forgoing the customer acknowledges that MVVIS is not responsible for any losses (including production losses) arising due to disease or pests in the vines (as stated above) or otherwise in relation to the performance of the material.
11. Interest on overdue customer accounts will be charged at the prevailing overdraft rate of Australia and New Zealand Banking Group Limited.
